Brand story

ARJUN represents focused learning, purposeful action and the journey from challenge to possibility.

The brand brings Arjun's focus and discipline into modern technology and AI, helping people turn problems into practical solutions. It is a personal brand first: Arjun Basnet, digital and AI consultant in Kathmandu, working on search visibility, AI automation, websites, apps and custom software for businesses in Nepal and abroad.

Build order for every piece of work: **person, purpose, problem, technology, solution, impact**. Arjun's personal brand comes first; AI is the tool, not the headline.

Focus

A single point of intent, like the archer who saw only the bird's eye.

Journey

Rising forms and mountain paths: growth through challenge.

Intelligence

Clean geometry and considered gradients, never robots or circuit boards.

Transformation

Problem, understanding, solution, impact.

FROM PROBLEM TO SOLUTIONS

The mark

Four ideas, one simple form. Two rising strokes make the A; one whole spark sits above the summit.

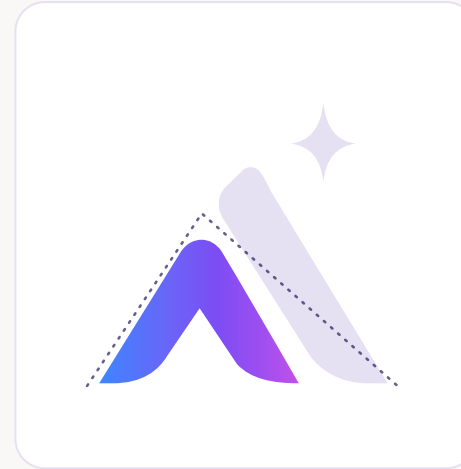

A for Arjun

The two rising strokes meet in one continuous form to make the initial of the name. Personal identity comes first; everything else is built on it.

The arrow of progress

The rising strokes carry forward, up-and-right momentum: movement from uncertainty toward clarity, from problem toward solution.

The peak

Read as a whole, the A becomes a Himalayan summit: growth, challenge and the long climb of learning.

The focus spark

A guiding point above the summit. One unbroken spark, so the mark reads as a single line of intent from base to peak.

Logo system

Use the most complete version the space allows. Step down only when the slogan would fall below its minimum size.

Primary, stacked

Website, presentations, business materials, main social identity.

Secondary, horizontal

Headers, footers and wide spaces.

Compact

When the slogan would fall below its minimum size.

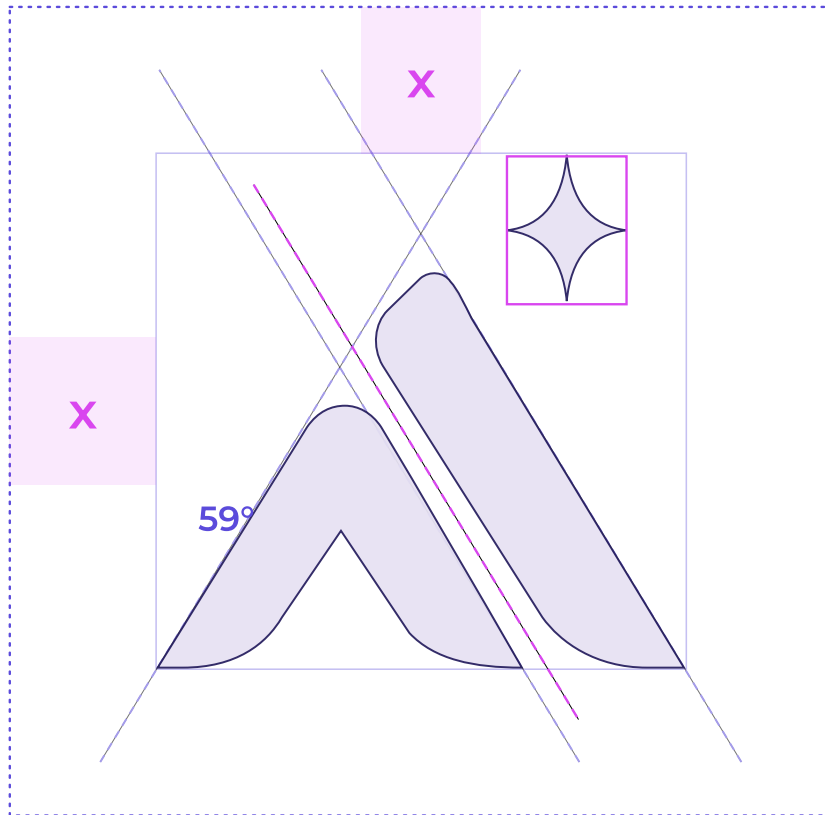

Mark

App icon, favicon, avatar, watermark, small digital uses.

Construction and space

Every principal stroke leans at roughly 59°, and the spark sits whole above the summit on the same rising line. Never redraw, re-space or re-proportion the mark.

Clear space

Keep a margin of at least **X** on every side, where X is the height of the spark. Nothing else, including text, other logos or the page edge, should enter this zone.

Minimum sizes

Version	Screen	Print
Mark	16 px	6 mm
Horizontal, compact	96 px	24 mm
Primary, stacked	140 px	40 mm
Horizontal with slogan	220 px	60 mm

Sizes are the width of the whole logo. Below these, the slogan or the spark stops reading; step down to the next version instead of shrinking.

Colourways

Gradient first, one colour when needed. Full colour on light backgrounds is the default; the others keep the mark working on dark surfaces, photography and single-ink print.

Full colour

Primary. On Warm White or white.

Full colour, reversed

Gradient mark, white wordmark on Night.

White on Aurora

For gradient backgrounds and photography.

Deep Indigo

One colour. Documents, embossing, formal use.

Black

One colour. Fax, stamps, single-ink print.

Colour

Variant Aurora: a controlled move from cool blue through violet into a touch of magenta. The gradient is a brand asset, not decoration.

Aurora Blue 0%

#F8C9E7

RGB 248 201 231

CMYK 6 27 3 0

Tints, surfaces

Balance Warm White 60% · Indigo and Night 25% · Aurora 10%. Coral Glow only ever appears as the tail of the gradient, never as a standalone fill.

Contrast Deep Indigo on Warm White 14.5:1 (AAA) · Iris on Warm White 5.7:1 (AA) · Lavender on Night 10.9:1 (AAA) · White on Aurora 3.5:1 minimum, large or bold text only.

*** Print** Aurora Blue, Violet, Magenta and Iris sit outside the CMYK gamut. The values shown are the closest match on coated stock (FOGRA39) and will look duller than on screen. Use extended-gamut digital print or matched spot inks and always approve a proof.

Typography

One geometric family for everything: logo, headings, interface and documents. Personality comes from spacing and weight, not from mixing typefaces.

Aa

Regular 400 Medium 500 **SemiBold 600**

Montserrat, SIL Open Font License. Included in the asset package as a variable font. Montserrat has no Devanagari: for Nepali text pair it with Mukta or Noto Sans Devanagari at the same weights.

Display · 600 · 56/60 · -0.02em

Learn. Build. Solve.

Heading · 600 · 32/38 · -0.01em

Turning problems into practical solutions

Subheading · 500 · 20/28

AI training, automation and digital systems for real businesses

Body · 400 · 16/26

Most problems that arrive described as “we need a website” turn out to be something else. Every engagement starts with working out which one it is.

Label · 500 · 11/16 · 0.34em

FROM PROBLEM TO SOLUTIONS

Icons and favicons

The app icon places the white mark on the Aurora gradient, the format that holds up best at small sizes. Light and dark versions cover every home screen and profile.

App icon, Aurora

App icon, light

App icon, dark

Favicon at 128, 64, 32 and 16 px. The SVG favicon swaps to lighter fills in dark mode.

Avatars use the Aurora icon; it survives the circular crop on LinkedIn and X because the mark is centred with even margins. Android adaptive icons (foreground and background layers) and the Play Store 512 px icon are supplied separately.

Applications

The identity at work. Night backgrounds carry the reversed logo; light backgrounds carry full colour; Aurora is reserved for hero moments and the primary action.

LinkedIn cover, 1584 × 396. The logo sits clear of the avatar on the left.

Open Graph image, 1200 × 630, for link previews.

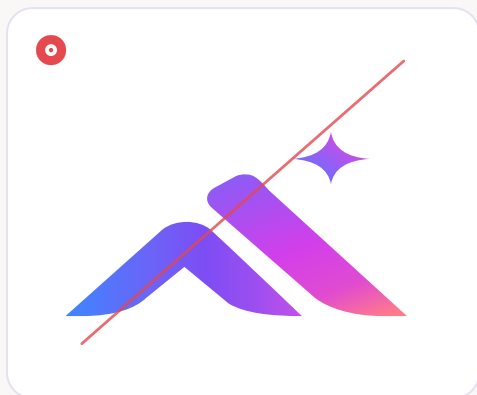

YouTube channel art, 2560 × 1440, logo inside the TV-safe centre.

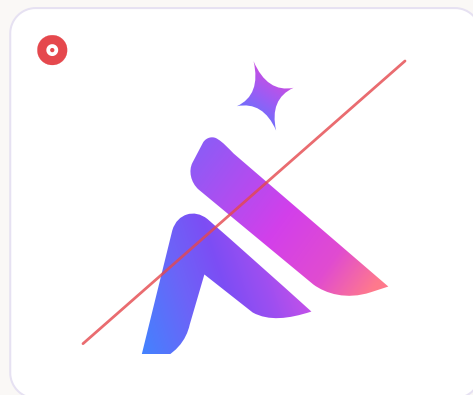

Business card front, 90 × 50 mm, Night. Back: white with the mark.

Misuse

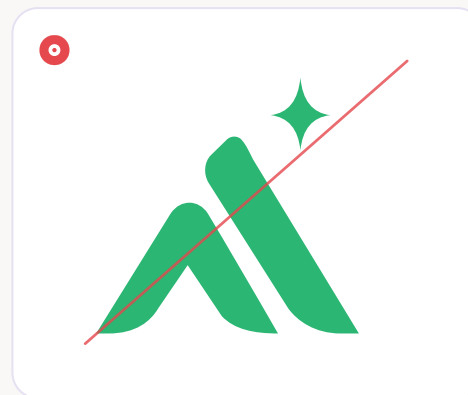

Keep it simple enough to recognise in a second. Always use the supplied files; these are the common ways a mark loses its clarity.

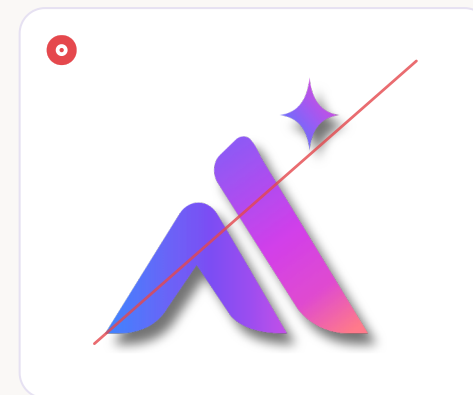

Stretch or squash

Rotate the mark

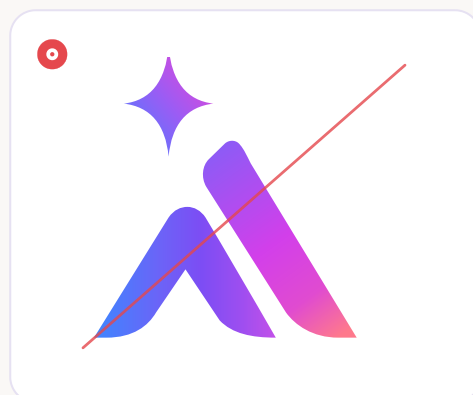

Recolour outside the palette

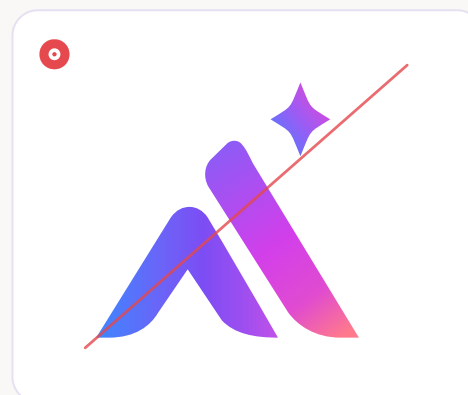

Add shadows, glows or 3D

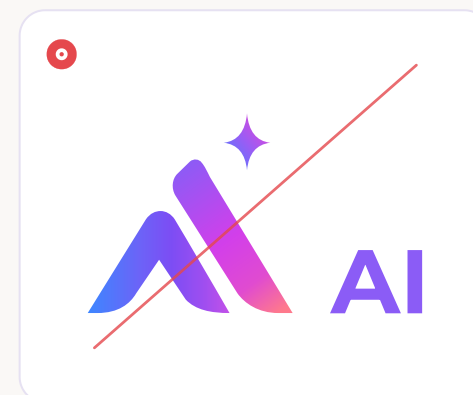

Outline the mark

Move or resize the spark

Swap in a generic sparkle

Add "AI" to the name

Voice

Practical, direct and human. Arjun talks like the person doing the work: plain words, honest limits, specific outcomes.

Learn

Understand modern AI and technology.

Build

Turn knowledge into working systems and workflows.

Solve

Use technology to fix real problems.

Grow

Create better outcomes and keep improving.

Focused · Curious · Intelligent · Practical · Ambitious · Human · Modern · Culturally grounded

Sounds like

“Your quotations take ten hours a week. We can make that two.”

“If I’m not the right person for this, I’ll tell you who is.”

Not like

~~“Leveraging cutting-edge AI synergies to revolutionise your business.”~~

~~“The world’s #1 AI-powered digital transformation partner.”~~

The slogan, FROM PROBLEM TO SOLUTIONS, leads. Never add “AI” to the name; AI is the tool, not the headline.

Asset package

Everything in ARJUN_Brand_Assets.zip. Use SVG for design and web, transparent PNG for documents and slides, JPEG only where transparency is not supported.

01 Logo, primary stacked

5 colourways · SVG, PNG
1000/2000/4000 px, JPEG

02 Logo, horizontal

With slogan · 5 colourways

03 Logo, horizontal compact

Without slogan · 5 colourways

04 Logomark

Tight square · 5 colourways · PNG 256 to 2048 px

05 Wordmark

With and without slogan · 5 colourways

06 App icons

Aurora, light, dark · rounded and square · iOS sizes · Android adaptive

07 Favicons

ICO, SVG, PNG 16 to 512 px, apple-touch-icon, manifest, head snippet

08 Social

Avatars and covers for LinkedIn, X, Facebook, YouTube, Open Graph

09 Watermark

Solid, 25% and 15% opacity

10 Colors

CSS variables, JSON, Adobe ASE, GIMP GPL, palette sheet

11 Fonts

Montserrat variable TTF and WOFF2 with licence

12 Guidelines

This document

Which file to use

Web and apps SVG for logos; the favicon set as supplied; Aurora app icon for stores.

Documents and slides Transparent PNG at 2000 px; full colour on light pages, reversed on Night.

Print SVG (or PDF exported from it) for vector output; one-colour Deep Indigo or Black for single-ink jobs; always request a proof for Aurora.

Social Aurora avatar 400 px; covers as supplied per platform.

Email signature PNG mark at 104 px, displayed at 52 px.
